FOR IMMEDIATE RELEASE

Alvarion® Certifies North American Best-of-breed Partners as Part of Strategic WiMAX™ Support Initiative

Agreements augment internal competencies to deliver turn-key national scale WiMAX deployments

MOUNTAIN VIEW, CA April 02, 2008 — Alvarion Ltd., the world's leading provider of WiMAX™ and wireless broadband solutions, today announced that new partners have been certified to support scaled WiMAX deployments following a rigorous vetting and training process. The agreements are part of a strategic initiative for Alvarion to manage and support nationally-scaled end-to-end deployments of Alvarion's award-winning OPEN™ WiMAX solutions. Alvarion's internal competencies include the umbrella of professional services from business modeling; radio and capacity planning; logistics; training, project management and network optimization. The following new partners complement Alvarion core strengths and ensure Alvarion quality in scale:

- Leadcom and Mycom – established tier 1 wireless deployment integrators -- have earned designation as Certified Professional Service Partners (CPSP) to design, deploy and integrate BreezeMAX® WiMAX solutions. Mycom will support U.S.-based carrier deployments, while Leadcom will be engaged for Caribbean carrier deployments.
- CTDI, a global telecommunications engineering, repair and service company, now handles Alvarion's North American logistics from its tier 1 facility based in Denver.
- DoceoTech, a leader in WiMAX technical training, has been engaged to deliver all BreezeMAX certified technical training to for operators' engineering and technical staff.

"Our business here in North America has grown and now includes a number of major carriers, as well as some unique project-based WiMAX business," noted Greg Daily, President, Alvarion, Inc. "We selected the best companies in their fields to partner with us so we can manage any scale in a way that ensures Alvarion quality every step of the way. Our choice of these partners reflects Alvarion's global strategy to work with strong partners to best serve our customers."

"Mycom has earned its reputation building major carrier wireless networks," said Richard Hessler, President, Mycom North America. "The open nature of Alvarion's WiMAX solutions allowed us to quickly ramp to support these same carrier customers in growing WiMAX ecosystem."

"Leadcom is delighted to partner with Alvarion, offering together a new standard of WiMAX solutions," commented Dr. Yoel Bar Gil, CTO for Leadcom. "As established tier 1 integrators with unparalleled breadth of skills, Leadcom looks forward to combining our abilities with Alvarion WiMAX products throughout the Caribbean."

About Mycom

Mycom International is a leading global provider of innovative engineering services and state-of-the-art, leading edge OSS software solutions to the Telecom industry.

Mycom International has presence in 10 countries through 16 offices and has been awarded many large nationwide infrastructure design and deployment contracts by the major telecom vendors and carriers. More information about Mycom's services and products can be found on the web at www.mycom-int.com or email products@mycom-int.com

About Leadcom

Leadcom, established in 1982, is an international leader in innovative telecommunications solutions. Incorporated in Israel, Leadcom was admitted to London's AIM market in April 2005.

Partnering with global operators and equipment vendors via its activities in over 50 countries throughout the Americas, Europe, Africa and Asia, Leadcom delivers services in the supply, implementation and management of telecommunications network services and solutions.

About CTDI

A premier Telecommunications service company headquartered in West Chester, Pa., CTDI has provided groundbreaking maintenance and product service solutions to the global telecommunications industry since 1975. Today, CTDI offers the most comprehensive Service Portfolio in the industry that includes: Wireline Repair & Logistics, Wireless Repair & Logistics, Network Deployment Services, Global Supply Chain solutions and Product Engineering & Manufacturing. Today, CTDI services Original Equipment Manufacturers (OEM) and Carriers from 38 international strategic repair and logistics locations supported by an experienced team of over 3,700 telecommunications professionals. CTDI feels we are the best in the industry at what we do and has a company-wide commitment to achieving service excellence.

About DoceoTech

DoceoTech, Incorporated is a Danville, California provider of technical knowledge-transfer solutions on wireless broadband topics. DoceoTech creates and distributes practical wireless certification courses, including the WiMAX Forum(R) Certified Training program, as well as

courses on IEEE(R) 802.xx wireless standards, and custom training solutions. DoceoTech distributes classroom and e-learning programs in the Americas, Europe and Asia through a network of resellers and training delivery partners. DoceoTech's faculty are listed authors of 55 patents, have written five IEEE Press reference books, and are principal creators and authors of the technologies and standards in their fields of concentration. For more information, see www.doceotech.com.

About Alvarion

Alvarion is the largest WiMAX pure player, ensuring customer long-term success with fixed and mobile solutions for the full range of frequency bands. Based on its OPEN™ WiMAX strategy, the company offers superior wireless broadband infrastructure and an all-IP best-of-breed ecosystem in cooperation with its strategic partners. Alvarion boasts over 200 commercial WiMAX deployments worldwide (www.alvarion.com).

This press release contains forward-looking statements within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. These statements are based on the current expectations or beliefs of Alvarion's management and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements. The following factors, among others, could cause actual results to differ materially from those described in the forward-looking statements: the failure of the market for WIMAX products to develop as anticipated; Alvarion's inability to capture market share in the expected growth of the WIMAX market as anticipated, due to, among other things, competitive reasons or failure to execute in our sales, marketing or manufacturing objectives; inability to further identify, develop and achieve success for new products, services and technologies; increased competition and its effect on pricing, spending, third-party relationships and revenues; as well as the inability to establish and maintain relationships with commerce, advertising, marketing, and technology providers and other risks detailed from time to time in the Company's 20-F Annual Report Risk Factors section as well as in other filings with the Securities and Exchange Commission.

Information set forth in this press release pertaining to third parties has not been independently verified by Alvarion and is based solely on publicly available information or on information provided to Alvarion by such third parties for inclusion in this press release. The web sites appearing in this press release are not and will not be included or incorporated by reference in any filing made by Alvarion with the Securities and Exchange Commission, which this press release will be a part of.
